Informatsionnyy Byulleten' (USSR) 1960, no. 2, p. 37-42

DESCRIPTORS: *Meteors, Brightness, Determination,
Photography, Photometers

Instruments for determining the brightness of meteors
by a photographic method are described. Construction
of new equipment used in the Astronomical Observatory
of Kiev State University is discussed. The principal
part of this apparatus is a freely swinging collimator
with an assembly of artificial meteors. With the aid of
light marks - the trace of one of the artificial meteors
is interrupted 50 times per second - it is possible to

Trans. of Sovetskaya Antarkticheskaya Ekspeditsiya.
[Informatsionnyi] Byulleten', 1959, no. 4 [p. 43-48].

DESCRIPTORS: *Ocean bottom, *Mountains,
Indian Ocean.

There appears to be a line of new underwater upheavals that bears witness to the existence in Cenozoic times of a continental connection of Antarctica to the rest of the continent of the Southern Hemisphere. These formations on the ocean bottom formerly were an expanse of dry land. (Author)
